## Minds Mechanical and CMMS Inc

### ABOUT US

Minds Mechanical and CMMS Inc. have partnered to provide our clients with a comprehensive solutions-based service with a strong emphasis on product conformance and quality. Our diverse team of experts allow us to be a single source provider to aerospace manufacturers world-wide. Contact us today for a consultation and let us help improve your Supplier Score.

### MANUFACTURING SOLUTIONS

In today's manufacturing environment, the cost of quality is high, but the cost of failed parts and lost contracts is much higher. Our full-service manufacturing solutions offer the expertise, tools, and resources necessary to help your products comply with strict quality standards.

Our team of engineers will help quickly and systematically identify production related issues affecting quality, and our intelligent manufacturing approach enables our team to effectively improve your end product with minimal disruption to ongoing operations.

Analysis and consulting to raise your Supplier Score.

Improve operational processes and quality of your end deliverable.

Full service metrology - professional operators available for on-site services.

### CMMS INC ON-SITE SERVICES

CMMS Inc. is a global leader in providing innovative manufacturing solutions and portable 3D metrology services.

Understanding these innovative technologies and properly implementing them into new and existing workflows is where CMMS Inc. adds unparalleled value and expertise.

Our talented and responsive team combined with our versatile service offerings have helped position us as a preferred single-source service provider for manufacturers across the globe.

## IMI - INTELLIGENT MANUFACTURING AND INSPECTION

Intelligent Manufacturing and Inspections is Minds Mechanical's proprietary flagship software. IMI is cloud-based, multi-tenant manufacturing quality software that saves money, reduces waste, and keeps parts passing inspection. IMI is your total manufacturing process solution - with inspections, NCRs, 3D models, part history, and powerful analytics all in one application.

### IMI Features

Host all your inspection data, models, parts, assemblies, and projects - accessible from any device.

Automatic revisioning for updated models for all authorized users.

Robust analytics help identify any procedural issues.

Easily visualize inspection and analytics data.

### Machine Accuracy Data Feedback

Machine data feedback identifies and alerts you of potential accuracy issues.

IMI can be customized to send out automatic, time-based emails of machine accuracies for every individual machine.

Utilize this data to stay on top of calibrations, with advanced analytics to optimize machine uptime.
